

HOW TO AUTO-TRANSLATE YOU TUBE VIDEOS

You can use You Tube to automatically translate closed captioning for any video. Simply follow the directions below:

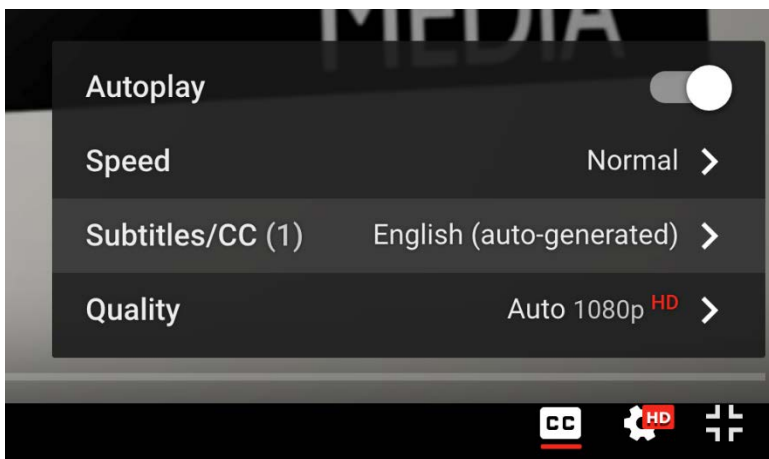

Step 1: Make sure that you have the closed captioning turned on. You'll know this by the red bar underneath the CC icon.

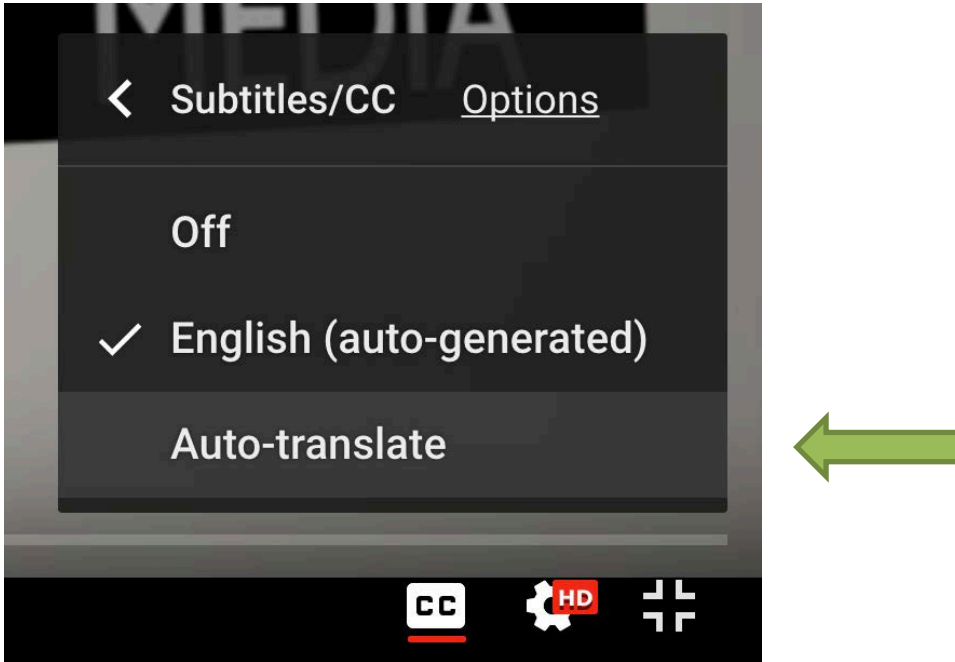

Step 2: Now click on the setting icon (sprocket)

Step 3: Click on the Subtitles menu

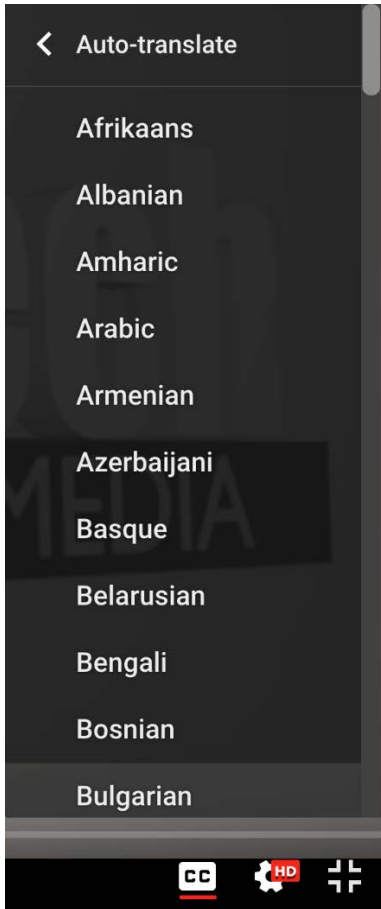

Step 4: Click on Auto-translate

Step 5: Choose your language

And now you are ready to watch any video on You Tube with closed captioning in your language. Please keep in mind that the accuracy of the captioning is not always the best so while the translation may be accurate the content that is being translated may not.
