

FOR IMMEDIATE RELEASE

HEADLINE: New product protects tanks and other large containers from catastrophic spills

Jacksonville, FL – December 8, 2016 – The economical Ultra-IBC SpillPallet Plus™ is designed to provide secondary containment for Intermediate Bulk Containers (IBCs). The units use a 100% polyethylene (PE), 365-gallon sump together with (4) all-polyethylene supports and heavy-duty deck to offer exceptional chemical compatibility and superior weight capacity (8,500 lbs). A low profile, 28" overall height and forklift ability allow safe and convenient handling and dispensing. Optional Bucket Shelf attaches easily to catch small leaks and drips from IBC dispensing spouts. 365-gallon sump meets EPA Container Storage Regulations.

UltraTech International, Inc. was formed in 1993 with one goal in mind: to save the world from toxic waste by creating the finest offering of spill containment and spill response products. Since then, its vision has expanded into additional product categories and technologies and the company now features a product line that consists of over 350 unique products designed to keep the world safe and clean.

Focusing intensely on meeting customer needs, UltraTech's ongoing goal is to invent, innovate or develop a better solution. The company has introduced an average of 20 new products per year and their design and development team is credited with over 60 patents. They are industry leaders in spill containment, stormwater management, facility protection, construction compliance and oil spill response and are responsible for bringing many advanced technologies to market.
