

FOR IMMEDIATE RELEASE

HEADLINE: Hidden containment bladder automatically unfurls to capture large spills or drum leaks.

Jacksonville, FL – January 24, 2017 - UltraTech International, Inc., leaders in the environmental compliance industry have recently added the Ultra-Spill Deck Bladder Systems to their innovative product line. By utilizing a “hidden” containment bladder, the product can meet EPA and other federal and state regulations while maintaining a much smaller footprint than traditional spill containment decks and pallets. Smaller leaks, drips and spills are captured by the unit’s polyethylene sump. Larger, catastrophic spills will flow through a bulkhead fitting and automatically unfurl the 66-gallon bladder.

“The Spill Deck Bladder System allows our customers to safely store their chemicals and hazmat without taking up valuable floor space” said UltraTech Engineering & Manufacturing Director, Mathew Clancy.

The systems are available in 1, 2 and 4-drum models and replacement bladders are available. All of the Ultra-Spill Deck Bladder Systems are covered by the company’s 5-year warranty.

UltraTech International, Inc. was formed in 1993 with one goal in mind: to create the world’s finest offering of spill containment and spill response products. Since then, its vision has expanded into additional product categories and the company now features a product line that consists of over 350 unique products.

Focusing intensely on meeting customer needs in an innovative and cost-effective manner, the company has introduced an average of 20 new products per year. UltraTech's design and development team is credited with over 60 patents. They are industry leaders in spill containment, stormwater management, facility protection, construction compliance and oil spill response.
