Description of the product: (Include specific quantifiable details from tech data sheet. Advertising generalities are not appropriate.)

Ultra-Grate Guard is a reusable temporary catch basin filter made from high visibility, high flow geotextile fabric that removes sediment, trash and debris from entering a catch basin. Ultra-Grate Guard can be custom ordered to fit the combination grate size for the project, standard sizes include 24"x 36", 24" x 40", and 28" x 42" .

The unit slides over the storm grate like an envelope and the grate is placed back in the frame recess. The built in lift straps make removal and replacement of the grate an easy process. The Grate Guard has an optional curb filter when installed in a drop inlet with curb opening.

Restrictions, (installation and/or use):

The Ultra-Grate Guard will function properly only when the product is installed and maintained as recommended by UltraTech International

Use of the product, and Benefit to CDOT (be specific to CDOT highway activities only):

Storm drain inlet protection (Type 3). The Ultra-Grate Guard keeps debris, silt, and sediment out of storm systems. The Ultra-Grate Guard drastically reduces the need to flush or routinely clean inlet. This product is easy to install, maintain and inspect. Sizes can be custom manufactured to fit any inlet.

Specifications: (listing those applicable is required)

- CDOT : 208.02(o), Table 208-14
- ASTM :
- AASHTO :
- FHWA :
