

FOR IMMEDIATE RELEASE

UltraTech's Portable Spill Containment Captures Railroad Spills

Jacksonville, FL – September 21, 2017 - UltraTech International, Inc., leaders in the environmental compliance industry have added the Ultra-Track Berm to their product line.

Leaky locomotives and tanker cars can wreak environmental havoc on a railroad site. A portable spill containment and quick response solution is the [Ultra-Track Berm](#). The Track Berm is portable enough to be quickly and effectively moved by one person to a leak or spill and can capture up to 144 gallons.

If a larger spill occurs or greater capacity is needed, drain hoses (not included) can be connected to the camlock fittings so the spilled material is directed to a waste collection area or larger container.

Key features include:

- Lightweight and portable spill containment unit is easily placed under leaking/spilling railcars.
- Dual-sump design provides protection for area on either side of the rail.
- Two (2) stainless steel camlock fittings allow quick and leak-free drainage of spilled chemicals.
- Closed-cell polyethylene foam provides secure sidewall structure.
- Durable 40 mil PVC construction withstands harsh railroad conditions and provides excellent chemical compatibility.

UltraTech International, Inc. was formed in 1993 with one goal in mind: to create the world's finest offering of spill containment and spill response products. Since then, its vision has expanded into additional product categories and the company now features a product line that consists of over 350 unique products.

Focusing intensely on meeting customer needs in an innovative and cost-effective manner, the company has introduced an average of 20 new products each year. UltraTech's design and development team is credited with over 60 patents. They are industry leaders in spill containment, stormwater management, facility protection, construction compliance and oil spill response.
