

## Ultra-Hose Stand - Specifications

### Keep fueling hoses off containment berm sidewalls to help maintain full containment capacity

Designed for fueling operations where heavy hoses cross portable containment berms, the Ultra-Hose Stand acts as a bridge over the berm sidewall. It supports the hose so the sidewall can remain upright and the berm can retain its intended capacity.

- Supports hoses without loading the berm sidewall
- Use inside, outside, or straddling a containment berm
- Top cutout accommodates hoses up to 6.5 in. diameter
- Rugged polyurea construction; lightweight and portable

| Part# | Description      | Material of construction | Max Hose Size | Rated load     | Weight<br>lbs. (kg) |
|-------|------------------|--------------------------|---------------|----------------|---------------------|
| 8369  | Ultra-Hose Stand | Polyurea                 | 6.5 in        | Up to 400 lbs. | 5.0 (2.3)           |

### Technical Specifications

| Specification                    | Published Value                                                                  |
|----------------------------------|----------------------------------------------------------------------------------|
| Overall dimensions               | 16.3 x 9.3 x 23.3 in. (412.8 x 235 x 590.6 mm)                                   |
| Bottom opening width             | 6 in.                                                                            |
| Overall opening height           | 14 in.                                                                           |
| Straight vertical opening height | 11 in.                                                                           |
| Top hose cutout                  | Accommodates hoses up to 6.5 in.                                                 |
| Load capacity                    | Up to 400 lb; tested with a uniformly distributed load across a 6.75 in. OD pipe |
| Color options                    | Custom colors available; contact UltraTech for details                           |

**Typical Applications:** Fueling and transfer operations involving tanker trucks, portable containment berms, and other setups where a hose must cross or pass alongside a flexible berm wall.

**Installation Options:** The Ultra-Hose Stand can be positioned completely inside the berm, completely outside the berm, or straddling the berm with the sidewall passing through the opening in the side support.
