

Ultra-Archaea® Tablets

Clean up oil, grease, septic tank sludge and blackwater quickly, effectively, and naturally

Ultra-Archaea are living microbes that use many forms of our waste as a food source. By placing them in contaminated areas such as septic tanks, grease traps and stormwater catch basins, pollutants can be eliminated naturally.

Ultra-Archaea Tablets provide a convenient way of delivering the Archaea into waste areas. The bentonite clay tablets provide a hospitable environment for the dormant microbes until they are needed.

5252

Common uses include:

- + Flushing one or two tablets down the toilet once a month will keep top and bottom sludge from accumulating in septic tanks.
- + Convenient for use in recreational vehicles to keep blackwater cleaner and with less odors
- + Drop a tablet or two into bilges to help remove sheens
- + Tablets can be used in grease traps in restaurants to reduce grease content and the frequency of cleaning and maintenance.

Features:

- + High concentration of Archaea (20 billion per gram) - One tablet goes a long way!
- + Easy to break up and flush or drain - Simple to use. Just toss a tablet or two into the contaminated area.
- + Environmentally-friendly - 100% natural. This specific collection of microbes (Ultra-Archaea) has not been genetically altered or engineered.

Part#	Description	Weight
5252	Archaea Tablets (12-pack, 24 tablets per tube)	1.5 lbs (0.7 kg)
