## Ultra-Drain Guard® Trash & Debris Model

Keep trash, debris and other large pollutants out of the water system

The Ultra-Drain Guard is engineered to filter stormwater waste before it becomes a problem in the water system. As a storm drain filter, it removes contaminants like litter (cups, food wrappers, cigarettes) and other debris as stormwater flows through it.

### Product Highlights

- + Fits drains up to 30" x 40"
- + Large weave fabric allows for maximum water flow rate - reduces ponding/flooding issues
- + Built-in straps allow easy removal when Drain Guard is full and needs to be emptied/replaced
- + Helps comply with NPDES, 40 CFR 122.26 (1999) when used as Best Management Practice in Stormwater Pollution Prevention Plans.
