Ultra-Gutter Guard RT[®]

Heavy-duty curb inlet protection keeps contaminants out even in heavy storm events

The Ultra-Gutter Guard RT is a cost-effective stormwater management solution designed to provide exceptional erosion and sediment control at the curb.

With its recycled rubber filter media, the Ultra-Gutter Guard RT is both reliable and environmentally friendly. It features a high-flow overflow weir that prevents ponding and flooding during extreme wet weather events, while its high-flow outer filter efficiently removes contaminants from the stormwater flow. The UV-resistant, woven monofilament polypropylene filter fabric ensures a longer service life when compared to other inlet guards.

The Ultra-Gutter Guard RT is easy to install and reuse, and the product's weight keeps it securely attached to the curb surface without the need for weights, anchors, or straps.

Product Highlights

- + Designed with high-flow overflow weir - prevents ponding/flooding during extreme wet weather events.
- + High-flow outer filter quickly and effectively removes contaminants from water flow.
- + UV-resistant, woven monofilament polypropylene filter fabric provides extended service life.
- + Weight of unit holds it securely to curb surface - easy to install, use and reuse.
- + Environmentally-friendly - filter media composed of 100% recycled, shredded rubber tires (NO steel).
- + Heavy-duty, pre-installed lift loops make lifting, installing and moving quick and easy.

Ultra-Gutter Guard RT

Part#	Model	Dimensions in. (mm)	Weight Lbs. (Kg)
9144	Gutter Guard RT, 6-foot	72 x 8 Dia. (1,829 x 203)	50.0 (22.7)
8931	Gutter Guard RT, 9-foot	108 x 8 Dia. (2,743 x 203)	70.0 (31.8)
