## Ultra-Rack Sump® Steel Model

Spill containment designed for racking systems

- + Provide secondary containment for flammable liquids, chemicals and hazardous materials - leaks and spills are captured before they can harm the surrounding environment.
- + Fits most industrial racking systems - saves valuable floor space.
- + Heavy-duty, 12-gauge galvanized steel construction provides years of service and excellent chemical resistance - will not melt or deform from extreme heat or fire.
- + 100% leak-free tested.
- + Removable grating for easy clean-up and maintenance.

Part#	Overall Dimensions in. (mm)	Containment Capacity gal. (L)	Weight lbs. (kg)
2397	96 x 50 (2,438 x 1,270)	70 (265)	200 (90.7)
