ULTRA-PELLET BERM®

Weighted Containment Berm stays in place in windy conditions

The Ultra-Pellet Berm is designed to capture and contain plastic pellets. Its rugged PVC construction ensures long service life, while the large, 6-inch diameter drain keeps pellets in the berm and allows rainwater to pass through quickly. Four included weights can be installed to help keep the Pellet Berm in place, even in windy conditions.

- + Heavy-duty 40 oz. PVC construction provides long-lasting durability and excellent chemical resistance
- + Large 6-inch diameter drain allows rainwater to drain quickly while retaining pellets
- + Four built-in sleeves in the base hold the included rebar weights, adding 2 pounds to help keep the unit in place
- + Folds for compact storage and features built-in carrying handles for easy transport

Large 6-inch drain.

Built in sleeves in the base hold the included rebar weights, adding 2 pounds to help keep the unit in place.

Part#	Description	Dimensions in. (mm)	Construction	Weight lbs. (kg)
8859	Ultra-Pellet Berm	36 x 30 x 4 (914.4 x 762 x 101.6)	40 oz PVC- Black	8.5 (3.85)
