## Ultra-Containment Berm® Foam Wall Light Duty RPE - Specifications

Designed for lighter applications where portability and ease of use matter most, the Ultra-Containment Berm – Light-Duty Foam Wall Model delivers reliable spill protection in a streamlined, economical design. Its low-profile construction makes it ideal for routine maintenance, indoor use, and temporary containment needs without the bulk of heavy-duty systems.

- Designed for spill containment of drums, intermediate bulk containers (IBCs), and equipment.
- Low-profile (4 in.) foam sidewalls compress under vehicle loads to allow drive-in/drive-out access.
- One-piece construction; no tools or assembly required for deployment.
- Constructed from 30-mil reinforced polyethylene with textured surface for enhanced durability and chemical resistance.
- Integrated handles facilitate manual handling, positioning, and relocation.

SPECS	TEST METHOD	VALUE
Grab Tensile Strength	ASTM D7004	150 lbs.
Tongue Tear	ASTM D5884	50 lbs.
Puncture Resistance	ASTM D6241	375 lbs.
Max Static Use Temp	N/A	180° F
Min Static Use Temp	N/A	-70° F
