

Ultra-Drain Guard, Reusable Model[®] Low-Capacity

A rugged, reusable catch basin insert with built-in lifting straps

The Ultra-Drain Guard[®] – Reusable Model, Low Capacity installs directly inside the catch basin to capture sand, dirt, silt, and sediment before they leave your site — helping you stay compliant without turning your inlet into an obstacle course.

- + Woven, high-visibility polypropylene construction - built tough for real construction sites — not just light-duty runoff and good intentions.
- + Shallow, 24 inch, depth is ideal for areas with less sediment loading and/or less rainfall.
- + Installs inside the catch basin - secured under the grate so it stays in place — no shifting, no blowouts, no equipment knocking it loose.
- + Captures sand, dirt, silt & sediment - stops pollutants before they enter the storm system.
- + Built-in overflow ports - allows controlled water flow during heavy rain to help prevent ponding and flooding.
- + Reusable design - Lift it out. Dump it. Reinstall.
- + Heavy-duty lifting straps - makes installation and removal fast and manageable — no fishing around inside the catch basin.
- + Helps support NPDES compliance - a simple BMP that helps keep your SWPPP inspector happy.
- + Fits standard street drains and combination drains (closed-cell foam inserts included).

Part#	Dimensions ft. (m)	Capacity gal. (L)	Weight lbs. (kg)
8940	2 x 2 x 2 (0.6 x 0.6 x 0.6)	359 (1,359)	1.0 (0.45)
8941	2 x 3 x 2 (0.6 x 0.9 x 0.6)	748 (2,831)	2.0 (0.91)
8942	2 x 4 x 2 (0.6 x 1.2 x 0.6)	1,047 (3,963)	2.0 (0.91)
