## Ultra-IBC Mini Funnel™ NEW PRODUCT

**Make IBC filling faster, cleaner, and easier**

The Ultra-IBC Mini Funnel provides a simple, effective way to direct liquids exactly where they need to go—without spills, splashes, or wasted product. Designed specifically for intermediate bulk containers, this rugged polyethylene funnel fits securely over the tank opening and integrates with the IBC cage for stable, hands-free pouring.

- + **Designed for IBCs** – Built-in spout fits directly into the top opening of standard intermediate bulk containers for controlled pouring.
- + **Stable cage-mounted design** – Integrated slots allow the funnel to fit securely over IBC cage supports for added stability during use.
- + **Better reach for elevated IBC openings** – The wide funnel opening makes pouring easier and more comfortable for operators of different heights.
- + **Hands-free bucket draining** – Molded recess holds 5-gallon buckets upside down so they can passively drain into the container.
- + **Reduce spills and product loss** – Large funnel opening helps capture splashes and misdirected pours.
- + **Durable construction** – Made from 100% polyethylene for excellent chemical resistance and long service life.
- + **Lightweight and easy to handle** – Simple to install, remove, and move between containers.
- + **Ideal for a wide range of liquids** – Perfect for oils, chemicals, coolants, cleaning solutions, and other industrial fluids.

Part#	Description	Dimensions in. (mm)	Material of Construction	Weight lbs. (kg)
0649	Ultra-IBC Mini Funnel, Black	27 x 16 x 8 (683 x 403 x 210)	Polyethylene	5.0 (2.3)
