

The Ultra-IBC Mini Funnel (Part #0649) is a rugged, polyethylene funnel designed to make filling intermediate bulk containers (IBCs) faster, cleaner, and safer. Its built-in cage-mounting system and oversized opening help eliminate spills, splashes, and wasted product during pouring operations.

PRODUCT SPECIFICATIONS

Part Number	0649
Description	Ultra-IBC Mini Funnel, Black
Dimensions	27 x 16 x 8 in. (683 x 403 x 210 mm)
Material	100% Polyethylene
Weight	5.0 lbs. (2.3 kg)
Color	Black
Compatible With	Standard intermediate bulk containers (IBCs)

Installation & Setup

Before first use, inspect the funnel for any damage that may have occurred during shipping. Wash with mild soap and water and rinse thoroughly.

Placing the Funnel on an IBC

1. Position yourself safely on a stable platform or use appropriate access equipment to reach the top of the IBC.
2. Orient the funnel so the built-in spout aligns with the top opening of the IBC.
3. Lower the funnel into position, engaging the integrated slots over the IBC cage support bars on either side.
4. Verify the funnel sits securely and does not rock or shift. The cage-mounting slots provide hands-free stability during pouring.
5. Confirm the spout is fully seated in the IBC top opening before beginning to pour.

Hands-Free Bucket Draining

1. Place the IBC Mini Funnel securely on the IBC as described above.
2. Invert a 5-gallon bucket and align it with the molded recess on the funnel surface.
3. Set the upside-down bucket into the recess. The molded recess holds the bucket in place, allowing it to drain passively into the container without manual assistance.
