# ULTRA-PELLET BERM, FOAM WALL MODEL™

**Weighted Pellet Containment Berm stays in place in windy conditions**

The Ultra-Pellet Berm is designed to capture and contain plastic pellets. Its rugged PVC construction ensures long service life, while the large, 6-inch diameter drain keeps pellets in the berm and allows rainwater to pass through quickly.

Added weights help keep the Pellet Berm in place, even in windy conditions.

## FEATURES & BENEFITS

- + **Heavy-duty 40 oz. PVC construction** provides long-lasting durability and excellent chemical resistance
- + **Large 6-inch diameter drain** allows rainwater to drain quickly while retaining pellets
- + **Built-in sleeves in the base** hold the included rebar, adding weight to help keep the unit in place
- + **Folds for compact storage** and features built-in carrying handles for easy transport

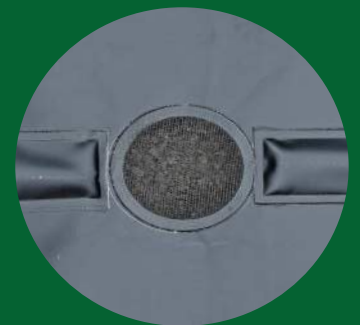

Corners can be tied down for added security
